suyogm32@gmail.com

Summary

Software Engineer with experience in **C++ development**, **distributed systems** debugging, and enterprise software platforms. Contributed to **Siemens Teamcenter** by resolving **backend** defects, implementing **WCAG accessibility** improvements, and enhancing **system reliability**. Strong foundation in data structures, algorithms, and scalable software development.

Experience

Software Engineer

Prescient Technologies, Baner, Pune

Jun 202G – Current

Siemens Teamcenter (Client Project)

- Developed backend functionality for Siemens Teamcenter, an enterprise PLM platform built on distributed service architecture.
- Implemented WCAG accessibility fixes by resolving issues related to ARIA attributes, keyboard navigation, and screen reader compatibility.
- Performed remote debugging of distributed backend services to identify and resolve production issues.
- Diagnosed and fixed G+ defects in C++ modules to improve system stability.
- Wrote unit tests using Google Test (GTest) to validate backend functionality.

Prescient Author Platform

- Contributed to development of Prescient Author, a low-code software development platform.
- Implemented soft delete functionality to support improved data lifecycle management.
- Developed partial page rendering using [ASP.NET](#) UpdatePanel to improve user interface performance.
- Collaborated with cross-functional teams in an Agile development environment to deliver production-ready features.

Software Engineering Intern

Persistent Systems, Pune, Hinjewadi, Pune

Dec 2022 – May 2023

- Completed technical training in Python, Linux, SQL, and data engineering fundamentals.
- Developed an e-commerce web application demonstrating backend development and database integration.
- Collaborated with development teams to implement scalable and maintainable software solutions.

Data Engineering Intern

Celebal Technologies, Pune

May 2022 – Jun 2022

- Implemented ETL pipelines for efficient data extraction, transformation, and loading.
- Optimized database queries and assisted in maintaining large-scale datasets.
- Performed data analysis to generate insights supporting business decision-making.

Education

B.Tech in Computer Science , Pune, 2018 – 2022

MIT Academy Of Engineering

- Relevant Coursework: Algorithms, Operating Systems, Machine Learning, Artificial Intelligence
- GPA: 8.59 / 10

Skills

- **Languages:** C++, Python, Java, JavaScript
- **Backend & Systems:** Distributed Systems, REST APIs,
- **Debugging, Data Structures & Algorithms**
- **Frameworks & Tools:** Google Test (GTest), Node
- **Databases:** MySQL, MongoDB
- **Cloud & Platforms:** AWS, Linux

Projects

FitVoyage – Fitness Application | Jan 2024 – Mar 2024

- Developed a full-stack fitness application that provides workout scheduling, exercise guidance, diet articles, and integrated shopping features for fitness products.
- Integrated the application with **Google Fit** to track and monitor user fitness activities and health metrics.
- Built responsive user interfaces and scalable backend services using **Next.js, React.js, MongoDB, Tailwind CSS, and Material UI**.

E-commerce Web Application | Apr 2023 – May 2023

- Developed a full-stack e-commerce platform enabling product browsing, shopping cart functionality, and secure online payments.
- Implemented **payment integration using Stripe** and cloud-based storage using **AWS S3** for product media management.
- Built the application using **Next.js, React.js, MongoDB, and Tailwind CSS** to deliver a scalable and responsive user experience.
